First Quarter 2020 Consolidated Summary:

Reported (GAAP)			Adjusted (Non-GAAP) ¹		
Sales	Operating Profit	EPS	Sales	Operating Profit	EPS ex Amortization
\$1.3 B	\$196 M	\$1.15	\$1.3 B	\$222 M	\$1.30

¹ Schedules at the end of this release contain reconciliations of reported GAAP to non-GAAP metrics.

Management Commentary

"I am incredibly proud of how everyone at IFF has delivered for our customers around the world through the most challenging of circumstances," said Andreas Fibig, IFF Chairman and CEO. "Our strong first quarter performance is a testament to the strength of our business and IFF's role as an essential partner in the global consumer product supply chain. We realized strong top and bottom-line growth, which reflects the breadth of our diverse portfolio as well as the important role we play in the everyday life of consumers. Even in the midst of increased demand and a challenging operating environment, our teams continued to deliver solid synergies related to the Frutarom acquisition, advanced our DuPont Nutrition & Biosciences integration planning and helped to support those protecting our communities, including through the creation of more than 65 tons of hand sanitizer and the development of a new scent, 'HOPE 2020,' in record time.

"Our ability to pivot quickly and adapt our daily operations has enabled us to responsibly operate our business while continuing to meet customer demand, despite a few logistics hurdles around the world. As regulatory restrictions aimed at protecting public health shifted worldwide through the quarter, we have worked through these challenges to realize minimal disruption across our production and supply chain. Protecting the health and safety of our colleagues, especially those still coming to our facilities, continues to be paramount as we navigate the challenges presented by COVID 19.

IFF Executive Vice President and CFO, Rustom Jilla commented, "We leveraged our mid-single digit sales growth to deliver solid adjusted operating margin expansion in the first quarter. Now more than ever, IFF's broad based exposure across regions, categories and customers positions us to remain resilient through these uncertain times. We are fortunate that the majority of our revenue comes from packaged food, beverage and personal care and hygiene products, where there is relative strength. Having said that, we are not entirely immune as categories such as Fine Fragrances, Cosmetic Actives, Fragrance Ingredients and Food Service are exhibiting challenges and we are seeing additional costs related to COVID-19. It also is clear that in the near-term, global conditions will be extraordinarily volatile and unpredictable, leading us to withdraw our full year financial guidance. We will continue to effectively manage our balance sheet by taking actions to generate strong cash flow, and to maintain ample liquidity even through a prolonged global downturn.

Mr. Fibig continued, "As we gain more visibility in the second quarter and beyond, we expect to share additional updates on the performance and outlook for our business. We've been through challenging and uncertain times before as a company and believe that we're well positioned to successfully manage through this and emerge as an even stronger company."

First Quarter 2020 Consolidated Financial Results

- Reported net sales for the first quarter totaled \$1.35 billion, an increase of 4% from \$1.30 billion in 2019. Currency neutral sales increased 6% driven by broad-based growth in Scent and Taste.
- Reported operating profit for the first quarter was \$196.2 million, an increase of 20% from \$163.9 million in 2019. Excluding those items that affect comparability, adjusted operating profit excluding amortization increased 9% on a currency neutral basis led by volume growth, productivity initiatives and integration related synergies.
- Reported earnings per share (EPS) for the first quarter was \$1.15 per diluted share versus \$0.96 per diluted share reported in 2019. Excluding those items that affect comparability, adjusted EPS excluding amortization was \$1.62 per diluted share in 2020 versus \$1.57 in the year-ago period. On a currency neutral basis, adjusted EPS excluding amortization increased 13% driven by adjusted operating profit growth, lower year-over-year interest expense and a more favorable effective tax rate.

First Quarter 2020 Segment Summary¹ : Growth vs. Prior Year

	Reported (GAAP)		Currency Neutral (Non-GAAP)	
	Sales	Segment Profit	Sales	Segment Profit
Scent	5%	17%	7%	19%
Taste	3%	5%	5%	6%

¹ Starting this quarter, IFF reports financial results in two segments, Taste and Scent, incorporating nearly all of the Frutarom business into the Taste segment.

Scent Segment

- On a reported basis, sales increased 5%, or \$24.4 million, to \$517.0 million. Currency neutral sales improved 7%, with growth in nearly all regions and all categories. Performance was driven by double-digit growth in Consumer Fragrance and high single-digit growth in Fragrance Ingredients. Fine Fragrance declined versus the prior year period, as the temporary closure of retail sites due to COVID-19 led to a deceleration in performance late in the quarter.
- Scent segment profit increased 17% on a reported basis and grew 19% on a currency neutral basis driven by volume growth and the benefits of productivity initiatives.

Taste Segment

- On a reported basis, sales increased 3%, or \$25.5 million, to \$830.3 million. Currency neutral sales increased approximately 5% with growth in all regions and nearly all categories. Performance was driven by double-digit growth in Savory Solutions and Inclusions as well as low single digit growth in Flavors and Natural Products Solutions. Standalone legacy Frutarom sales growth in the quarter would have been approximately 4%.
- Taste segment profit increased 5% on a reported basis and 6% on a currency neutral basis led by volume growth and integration-related synergies.

Business Environment Update Amid COVID-19

As the COVID-19 pandemic has spread globally, IFF is experiencing significant demand for ingredients and solutions used in certain consumer products, including packaged food, beverage and hygiene and disinfection, which represents approximately 85% of the Company's total 2019 revenue. At the same time, IFF is seeing weakness across other offerings exposed to temporary disruptions of consumer access to retail markets, such as Fine Fragrance and Cosmetic Actives, and away-from-home channels, such as Food Service.

IFF continues to adapt quickly to the current environment, with a focus on mitigating the near-term impact while positioning for continued long-term success following the crisis and remains optimistic on seeing improvement as the pandemic abates.

2020 Full Year Financial Guidance:

As the COVID-19 pandemic continues to evolve, there is uncertainty around its ultimate impact; therefore, the Company's full year financial results cannot be reasonably estimated at this time and have been withdrawn.

Audio Webcast

A live webcast to discuss the Company's first quarter 2020 financial results will be held on May 12, 2020, at 10:00 a.m. ET. The webcast and accompanying slide presentation may be accessed on the Company's IR website at ir.iff.com. For those unable to listen to the live webcast, a recorded version will be made available on the Company's website approximately one hour after the event and will remain available on IFF's website for one year.

Use of Non-GAAP Financial Measures

We provide in this press release non-GAAP financial measures, including: (i) currency neutral sales; (ii) adjusted operating profit; (iii) adjusted operating profit (margin) ex. amortization; (iv) adjusted EPS; (v) adjusted EPS ex. amortization and (vi) currency neutral adjusted EPS ex amortization.

Our non-GAAP financial measures are defined below.

Currency Neutral metrics eliminate the effects that result from translating international currency to U.S. dollars. We calculate currency neutral numbers by comparing current year results to the prior year results restated at exchange rates in effect for the current year based on the currency of the underlying transaction.

Adjusted Operating Profit excludes the impact of operational improvement initiatives, integration related costs, restructuring and other charges, net, losses (gains) on sale of assets, Frutarom acquisition related costs, compliance review & legal defense costs, and N&B transaction related costs ("Operating Profit Items Impacting Comparability").

Adjusted Operating Profit (Margin) ex. Amortization excludes the impact of Operating Profit Items Impacting Comparability and the amortization of acquisition related intangible assets.

Adjusted EPS excludes the impact of operational improvement initiatives, integration related costs, restructuring and other charges, net, losses (gains) on sale of assets, Frutarom acquisition related costs, compliance review & legal defense costs, N&B transaction related costs, and redemption value adjustment to EPS (often referred to as "Items Impacting Comparability").

Adjusted EPS ex. Amortization excludes the impact of Items Impacting Comparability and the amortization of acquisition related intangible assets.

These non-GAAP measures are intended to provide additional information regarding our underlying operating results and comparable year-over-year performance. Such information is supplemental to information presented in accordance with GAAP and is not intended to represent a presentation in accordance with GAAP. In discussing our historical and expected future results and financial condition, we believe it is meaningful for investors to be made aware of and to be assisted in a better understanding of, on a period-to-period comparable basis, financial amounts both including and excluding these identified items, as well as the impact of exchange rate fluctuations. These non-GAAP measures should not be considered in isolation or as substitutes for analysis of the Company's results under GAAP and may not be comparable to other companies' calculation of such metrics.

In the fourth quarter of fiscal year 2018, we began including Adjusted EPS ex. Amortization as a key non-GAAP financial measure of our business. Full amortization expense of intangible assets acquired in connection with acquisitions will be excluded from Adjusted EPS ex. Amortization calculation. The exclusion of amortization expense allows comparison of operating results that are consistent over time for newly and long-held businesses and with both acquisitive and non-acquisitive peer companies. We believe this calculation will provide a more accurate presentation in this and in future periods in the event of additional acquisitions. Further, this allows the investors to evaluate and understand operating trends excluding the impact on operating income and earnings per diluted share. In addition, the Frutarom acquisition related costs and N&B transaction related costs have been separated from costs related to prior acquisitions. The Frutarom acquisition related costs and N&B transaction related costs represent a significant balance and we believe this amount should be shown separately to provide an accurate presentation of the acquisition related costs. Our GAAP results and GAAP metrics do not change, and this change has no effect on day to day business operations, or how we manage our business.
